

Ajay Ramchandra Kori

Android & Flutter Developer | Mobile + AI Engineer

Ahmedabad, India | +91 8200564817 | ajaykori2130@gmail.com | ajaykori.netlify.app | github.com/ajay1130 | linkedin.com/in/ajay-kori-dev

PROFESSIONAL SUMMARY

Android & Flutter Developer with 5 years of experience engineering high-performance, real-time mobile applications serving millions of active users. At 5paisa, one of India's leading stock trading platforms, architected mission-critical trading modules including Order Book, Price Alerts, and secure transaction workflows handling live financial market feeds at scale. Highly specialized in Flutter (BLoC, Riverpod), native Android (Kotlin, Jetpack Compose), Clean Architecture, and MVVM across fintech, high-scale e-commerce, and real-time collaboration applications.

CORE SKILLS

Mobile	Flutter, Dart, Android, Kotlin, Java, Jetpack Compose, Material Design
Architecture	Clean Architecture, MVVM, BLoC, Riverpod, Modularization, LiveData, Coroutines
Backend & DB	RESTful APIs, GraphQL, Retrofit, Room DB, WebSockets, Local Persistence
Tools & Cloud	Firebase Suite, Firestore, FCM, CleverTap, MoEngage, Git, CI/CD pipelines
Payments	PayFort, Apple Pay, Tabby, Tamara (Multi-region installment gateways)
AI Tooling	Cursor, Claude Code, GitHub Copilot, OpenAI / ChatGPT API, Gemini API

PROFESSIONAL EXPERIENCE

Brainvire Infotech

Android & Flutter Developer

Ahmedabad, India

July 2021 – July 2026

5paisa | Real-time stock trading platform serving millions of active investors

- Engineered high-frequency Order Book, Price Alert streams, Market Search, and Mutual Fund modules.
- Optimized live market ticker processing, reducing WebSocket deserialization latency under peak market volume.
- Integrated CleverTap event tracking for behavioral personalization while maintaining zero-drop app stability.

Pan Home | Multi-national e-commerce app operating across UAE, Qatar, Oman, and Saudi Arabia

- Integrated regional payment infrastructure including PayFort, Apple Pay, and Buy-Now-Pay-Later gateways (Tabby, Tamara).
- Architected modular Product Listing (PLP), Product Detail (PDP), and User Account flows with MoEngage analytics.

Neighbourhood | Social community and local events platform

- Built interactive social feeds featuring instant reactions, threaded comments, and real-time chat via WebSockets.
- Implemented event discovery modules, geo-fenced local updates, and asynchronous push notification services.

GatherHall | Enterprise-grade communication and collaboration suite

- Implemented real-time group chat, low-latency audio/video calls, and end-to-end encrypted document sharing.
- Engineered scheduled transmissions, marketplace transactions, and a multi-lingual live feed.

NTC | Enterprise field operations and safety protocol management app

- Developed safety compliance checklists, field audit tools, time-stamped attendance logging, and role-based access.
- Built an offline-first media gallery supporting background asset uploads and multi-tiered manager approval.

Main Court | Production sports venue booking and management platform

- Led mobile development end-to-end, steering feature roadmaps, rapid release cycles, and critical bug resolutions.
- Improved runtime memory efficiency and reduced app bundle footprint across production releases.

EDUCATION

Master of Computer Applications (MCA)

Gujarat Technological University, Ahmedabad

2018 – 2021

Bachelor of Computer Applications (BCA)

Xavier Institute of Computer Application, Ahmedabad

2014 – 2017
